Hello everyone,

You've probably noticed that the NZ website has changed a bit.

We've added the option to switch to the English version.

This is largely thanks to two initiators: Swatik OK2IW

and Vítek OK5MM. Also contributing to this effort were

Zdenek OK2VBZ, who created the English version of the log import feature,

Petr OK1FCJ, who recommended that we include

settings for various logbooks (TR4W, DXLog, N1MM) in English on the site.

And especially Zdenek OK1DSZ, who created the English version, set it all up on

the computer, and explained it to me. And finally, me, who organized it all

and translated the logbooks.

Anyway, you can judge for yourselves how well we did. (No criticism, please.)

A big THANK YOU to everyone!!!!

Now we just need some testers from neighboring countries to join us. If we

have 150 participants in each round, I'll be satisfied and claim we're world-class.

Luboš OK1FGD, OK5NZ

Hello to all testers. Excellent conditions, strong signals

73 Jirka OK1OA

Thank you for the QSL card. 73, Robert OK2PYA

Hello, testers,

Things went smoothly today—thanks for the contacts, Tom OK2BFN for the breakthrough, Luboš for the results, and see you next time

73 Miro OM3ZU

Hi, Luboš!

I'm attaching the log from NZ461. Thanks for the contacts, and see you next week.

73! Peter, OM5CX

Hi Luboš, here's the log from NZ.

Thanks to you and everyone, 73 DE OM4AY.

Vy 73!

Krzysztof "Chris"

SP5KP, SN5N

Thank you for the race and the results. Radek OK1BM

Thanks to everyone for reaching out. I'm sorry, but I'm too busy right now.

Hi, Jirka, ok1luky

NZ No. 461: The first stage went pretty well, but interference set in during the second stage, and I had to ask for the NR QSO to be repeated frequently again.

73, Honza OK5MN (OK1MNV)

Hello, this is a great initiative, and I really enjoyed it, but I had some issues with the program—the file on your website isn't working properly; the period wasn't working. Maybe I did something wrong. Could you please advise? I'm using dxlog.net.

Hi Tadeusz,

I'll have to ask those who use DXLog about your question.

I use TR4W and I'm not familiar with your log.

Lubos OK5NZ

Can anyone help?

Once again today, there was heavy local interference for over half the contest. I was happy to make contact with two World Cup competitors. Thanks to everyone for the contacts.

72! Lád'a OK1LO/Q

IC-705, 5W, Windom

Hello,

The conditions were excellent today, and there was a good turnout. Thanks for the contacts and the feedback.

73, Stano OM8AQ

Hello, fellow testers, and thank you all for the contacts and QSLs. Conditions were good here, turnout was decent, and I really enjoyed the contest. 73! Looking forward to the next round.

ROMAN

OK2PKT

Hello everyone, thanks for the contact, and thanks to Luboš for the QSL card – Gusta – OK2GU

Hello,

Attached is the NZ 461 log. Conditions were good, with some local interference toward the end of the contest.

Thanks to everyone for the contacts, to Luboš for the evaluation, and I'm looking forward to the next round.

Have a nice day

73

Tony Ok1DOR
